From Library Journal

Walton, an economics professor and an assistant track coach at the University of California-Davis, treats his subjects as sports philosophers and educators. By including both famous (Vince Lombardi) and lesser-known (Percy Cerruty) coaches, he examines not just their popular successes and outstanding records, but how all were able to mold their athletes and advance their sports. Comparisons to prosperous business and management leaders reinforce the theme that success is the result of hard work, a demanding attitude, and attention to pride, organization, and dedication. Although Walton at times overemphasizes the importance of sports, this specialized volume is a worthy addition to larger sports collections.

"Winning three consecutive NFL championships under Lombardi at Green Bay left me feeling we had set a mark for future teams to shoot at. Doc Counsilman's six consecutive NCAA swimming championships and John Wooden's seven consecutive NCAA basketball championships may be marks never again equaled. Think about it. None of these records occurred haphazardly. *Beyond Winning* shares the philosophy, the principles, the winning minds of these and other great coaches. It's a book you will return to again and again."

"Gary Walton sets forth athletics as a great learning and testing experience, and coaches as among the best of all teachers. . . . Throughout my life I have often observed, in the words of St. Jerome, that 'athletes as a rule are stronger'—this applies particularly to successful athletes. Gary Walton tells why."

Clark Kerr, President Emeritus University of California, Berkeley

"A primer on what it takes to be a winner on and off the athletic field. Gary Walton has captured the philosophy and motivational techniques of the world's finest coaches."

#### About the Author

Dividing time between athletics and academics is nothing new to Gary Walton—he's been doing it since he was a freshman at the University of California at Berkeley. At that time, he was influenced by the legendary track coach Brutus Hamilton, whose philosophy emphasized athletics as part of personal development.

Dr. Walton continues to live by this philosophy at the University of California at Davis where he is professor and coach. In addition to being the founding dean of the university's School of Management, he is president of The Foundation for Teaching Economics, a professor of economics and management, and an assistant coach for the university's track team. Dr. Walton received his doctorate in economics from the University of Washington and has authored and coauthored eight books in economics and American economic history.

Dr. Walton's duties on the track include coaching middle-distance and distance runners. He is also a devoted runner himself. As for his coaching philosophy, Dr. Walton emphasizes dedication and hard work, preferring that runners achieve their personal best rather than worry about getting their names in the record books.

In "Beyond Winning", Gary Walton reveals the thoughts and teachings that made six coaches successful in sport. Readers get an intimate look at how each of these philosopher coaches followed a different path in his pursuit of excellence - Vince Lombardi, Woody Hayes, John Wooden, James "Doc" Counsilman, Brutus Hamilton, and Percy Cerutti. Walton devotes a chapter to each of these coaches and focuses on their ability to manage and motivate winning teams. While he notes the coaches' win / loss records and contributions to technical advances in their sports, he stresses their more significant contributions as educators and as role models.

Summarizes the philosophies of outstanding coaches

By A Customer

Great for young coaches and high school coaches. It will provide the coach with a framework of the importance of athletics and the role they play in later life development. It is not about "winning" alone ... but about the intangibles that accompany the process of winning. Great historical coaches are examined and insight is given into what they truly believed was important. A must for young coaches ... many life lessons are provided.

Lombardi, Wooden, and a few you might not have known

By Stosh D. Walsh

This book examines the coaching approaches of six "philosopher coaches": Vince Lombardi, Woody Hayes, John Wooden, James "Doc" Counsilman, Brutus Hamilton, and Percy Cerutti. Each is afforded a chapter in the book, and the final chapter gives a summary of the "essence of philosopher coaching." The book's premise is that the men presented believed that coaching was more than wins and losses, that it is inextricably intertwined with the development of the whole person. Each coach presented took a different approach to his methods, but all of them had this philosophical element in common. One of the pleasures of this book is that it has chosen coaches from a cross-section of sports: Lombardi and Hayes from football, Wooden from basketball, Counsilman from swimming, and Hamilton and Cerutti from track and field. Also interesting is that the summary chapter discusses, in part, the flawed elements of each coach's character, implying that they shared the journey toward self-discovery and personal development with the players they coached. An informative book that will certainly help shape (or re-shape) the coaching philosophies of those

who read it.

Four Stars

By Alex Sluijs

Good stuff here, collaboration of ideas and multiple perspectives. It's almost like cliff notes from great coaches. Easy to read and take what you want from it. Some things overlap and some ideas from coaches overlap but this is a really positive book for any coach.
