Dr. George = One Of A Kind!

By Mark Mohr

Writer Randy Roach has done an excellent job of helping Dr. George Fischbeck tell his remarkable story. I worked as a Producer at KABC-TV from 1979 until 1996 and this book brought back a ton of memories of what it was like behind the scenes at the #1 TV station in Los Angeles. I can say without hesitation that Dr. George is the rarest kind of person who was exactly the same on the air as he was off it. What really struck me about George Fischbeck was that, in addition to being passionate about his work, he was one of the kindest and most compassionate people I'd ever met. He just loved people, and it showed in everything he did. Bravo, Dr. George on a wonderful career and congratulations to Randy Roach for his hard work and diligent effort to tell the story of this remarkable man.

Dr. George was my 5-6 grade science teacher in the 1960's

By Debbie

I really enjoyed this book! Dr. George was my (on TV in the classroom) science teacher when I was in 5-6 grade in 1960's in Albuquerque. I was very happy to meet him once and gave him a tootsie roll. He proudly accepted the tootsie roll, wiggled his mustache, and placed the tootsie roll in his left shirt pocket. He then placed his hand over his heart (left shirt pocket) as he always has (in his signature pose) and said "I will keep this tootsie roll near and dear to my heart". Dr. George is that special kind of person that I will never forget. Thanks Dr. George for writing such a great book for all of us to enjoy! Thank you to the publishers too. A story very well told and a great celebration of his fabulous teaching and television career in New Mexico and LA. Dr. George, you are appreciated!

Dr. George is the best.

By Dr. John.

I've known Dr. George for many years and he truly is one of the finest meteorologists and science teachers you'll ever know. The book explores his life in teaching, his fine family, weather of course, and so much more. If you don't know George, you soon will because of his high esteem of his "dear friends" which is everyone. It was a privilege to work with him and just sit around and talk shop. George brought many important innovations to weather forecasting. Whether I was with him or just catching a weather forecast on the news, his forecasts were not to be compared with anyone else in the science. He was the first to bring great technology into forecasting by introducing the 500 millibar chart to weather forecasting on television. This chart represents a very important tool in forecasting. We gain so much from analyzing it and today's sophisticated satellite overlay images. It was the very first tool I used along with so much additional data to my research, even to this day. All because this nice and loveable weather forecaster introduced to me and mentored me, helping me gain a better understanding of meteorology, chemistry, and physics of our climate. Dr. George opens up a world of exciting study and shares much of it and so many wonderful things in his book. It is a must read, weather or not. You will love it and you will love George and feel as if you've known him personally for years. He's a "dear friend" and loved by so many. His "My Life in Weather" will be also. It's fun and entertaining as well as very informative. Plus, it's clean and wholesome reading and we don't see much of that anymore. It is heartwarming. It is the essential Dr. George. My "good friend".
