AMAZING but it works

By douglas Dern

I don't care how many reviews are on here saying it is a bad book and a hoax. This stuff works. I have been using with great success these rituals for a number of years. These are very powerful sumerian forces and used under the right magical context this stuff will blow your mind. If powerful magick is what you are seeking try it. What did Crowley say??? Question everything, record your own results. ANyone who says this book is junk has not tried it. THese are most powerful!!!!

THIS BOOK IS THE HOLY GRAIL ON PAPER!

By A Customer

...This book is basically the easiest way to hold the universe in your hand! I tried almost every spell in it and without exaguation, ALL WORKED! It's so simple and unlike other magical arts, it focuses on the imagination and true will. Basically, all you need is two candles and a stick of incense, no herbs, no nothing, and your prayers will be answered in ways you can't imagine. It's good for everything, money, love, danger or even black magic and curses (be sure not to toy around with it). All in all, for the price, it's the best deal you'll ever have.

Hair-raisingly creepy...

By C. M. Sharrah

I've always been fascinated by occult and other such works, and have collected numerous books on it (and those written by the infamous LaVey, while not necessarily occult, seem to be filed in the same category). I'm not a practitioner of magick by any stretch, but merely a curious reader who takes heed the warnings stressed by the author, even just for safety's sake. But once I got a little curious bored staring at the title, so I began to sketch out some of the glyphs contained within them into a spiral notebook, while contemplating how much I was displeased with a friend of mine at school. The next day in a math class (which I had with that friend), I pulled out that spiral notebook (since it held my math homework). Opening it to the last page, I saw the glyphs I sketched the night before. 'Coincedently' he then tilted too far back in his chair and fell to the floor and began to choke on a Jolly Rancher he had in his mouth. The sheer eerieness of the situation made me torch that piece of paper (which had my homework on it -- lost credit for the assignment) While it's likely the two events weren't connected, it was enough to freak me out. Whether the authenticity of this information is far from being proven, one thing remains constant: the mind is a much more powerful beast than we let on. Perhaps texts such as these are merely a tool for focussing harnessing the arcane power locked away in that other 90% of unused brain space.

A word to the curious: be weary of these books. While I don't 100% believe it, you won't catch me even trying to summon some of these 'deities'. Too many other strange occurances happened to me while I read this book. For example, I was reading through some of the descriptions late at night, and finally got so tired I fell asleep at my desk (on the book, no less). I awoke around 2am from a nightmare of whirling brown shadows repeating the same thing over and over. Picking my head up off of the book, and turned a few pages *forward* (which I had not read before), and saw those words -- syllable for syllable. After scanning through the portion I had read, they were not repeated once...now how do you explain that?

Too creepy for me...they are locked in a metal filing cabinet in my closet as we speak ^^
