B.S., M.L.A., D.D.S.

Director of Dental Anesthesia Education, Provident Hospital of Baltimore; Staff Anesthesiologist, Lutheran Hospital of Maryland; Former Visiting Associate Professor of Oral Medicine (Anesthesiology), Medical University of South Carolina, College of Dental Medicine; Clinical Field Instructor, University of Maryland, School of Dentistry

Written by a practicing dentist who spent 18 years as a full time anesthesiologist, this book is a how-to-do-it compendium for dental students, dentists, and physician and nurse anesthetists whose objective is to sedate or anesthetize ambulatory dental patients. The book emphasizes in minute detail all popular methods of conscious sedation including nitrous oxide sedation.

The purpose of the book is to provide a complete guide to practice for those in all specialties of dentistry who are training in anesthesiology, and for nurse and physician anesthetists who plan to work with dental practitioners.

For students in dental schools it offers a complete and simplified course in local anesthesia replete with illustrations of all the usual blocks. It also offers a simplified understanding of

the essentials of physiology, pharmacology, physical diagnosis, resuscitation, intubation, and laboratory test interpretations as they relate both to hospitalized and ambulatory dental patients. A chapter on the history of anesthesia in dentistry has also been included.

In the Foreword to the book, Dr. Donald Benson, Professor of Anesthesiology at the Johns Hopkins University School of Medicine wrote: "This book is a monumental effort and a worthwhile contribution and anyone practicing dental anesthesia should have this reference work in his library. Dr. Shane starts from the very beginning, bringing the reader through the basic principles of medical practice needed to render anesthesia care to the techniques of local and general anesthesia including sedation."
