Waste of Time: Don't bother with this dog of a book

By Dennis Stevens, Ed.D.

This book is self-published through CreateSpace, wherein, a separate company owned by Amazon provides the tools to help people self-publish and distribute their books.

I found the contents of this book to be incredibly poor and not in keeping with the glowing recommendations that are offered; the reviews make this book seem great but, as soon as I opened it, I could tell that it was self-published. It feels like it was written by a content farm. A deeper review of the book reviews leads me to believe that the reviewers have been falsified in some way-- I was so disappointed with the quality of the book's contents that I filed a return claim within five minutes of holding it in my hands.

In sum, if you need quality and up-to-date information on container homes, there are better ways to spend \$10-- don't waste your time on this book and in the end, make the same mistake that I made.
