Best way for me to learn guitar

By M. Perry

If you need to hear a song to learn to play it this is the holy grail of guitar books. Picked it up and in a week could play wish you were here all the way through quite well and am now working on money. This is a great self learning tool and I would definitely recommend it.

Great book with accurate tab!

By RLC

This is an excellent book for those wanting to learn some Floyd songs! The tab is accurate for those, like myself, that don't read music (yet). The CDs are nice as well, providing a "cover" version of the song and a

version with the guitar track removed so you can practice. What really shines about the CDs is the fact that you can loop sections of the music so you can get it down and slow down the track without changing the pitch! You can also change the key. Pretty nifty!

Definitely worth the cost!
